

## „Call for Additional Budget for Ongoing ICM Projects“

Dear employees of the ICM

Dear Ladies and Gentlemen,

We are pleased to inform you that a new call for proposals for ongoing ICM projects (collaborative, networking and bottom-up projects) has just been made available online at <https://www.icm-bw.de/en/research/open-calls>.

The aim of the supplementary funding is to further develop the successes and promising results of ongoing projects, e.g. in terms of follow-up proposals, publications, patents and cooperation with industry.

Only one follow-up proposal may be submitted per project. Applications may be submitted at any time until the initial budget of approximately €3 million has been allocated.

Funding up to a maximum of €75,000 per project or €10,000 per bottom-up project will be granted by decision of the Research Board on the basis of a proposal by the Management. Members of the Research Directorate are excluded from voting on all decisions in the call for proposals in the case of their own applications.

Above €75,000, the funding decision will be based on an external review of the renewal application in the form of a short written assessment. Whenever possible, this will be done by the original expert reviewers of the projects.

As always, instructions on the application process and application templates (application, one-pager) are available at <https://www.icm-bw.de/en/research/open-calls>. Applications must be submitted digitally, using all templates, to [gf@icm-bw.de](mailto:gf@icm-bw.de).

On behalf of the ICM

The joint management of the InnovationCampus
